WELCOME

Andrew, Norah, Oscar and Archie Cass – ANC Full French Charolais – would like to extend a warm welcome to everyone to our annual On-Property Sale.

We have been breeding stud charolais using only full french bulls since 1972 as a part of AYR Charolais, to advance on our own in 2002.

ANC join over 850 Full French breeders to Full French poll and homozygous poll bulls. We also use fully imported embryos (from different female lines) from France's best elite female genetics, unrelated to anything in Australia, in addition to some AI and single sire matings.

At ANC we breed cattle with depth of body which carries right through to deep hindquarters with width, length, plenty of muscle and doing ability. Our cattle have excellent milk, fertility, mobility, temperament, feet and structural correctness with loads of character and brilliant pedigrees.

SALE CATTLE

Our cattle are born and raised on grass. A couple of months before the sale, they will be given light feed rations and will remain in grassy paddocks to stay fit and retain the ability to walk long distances.

We look forward to your attendance on Friday 28th August 2026 at 12 noon at "Glen Laurel", Guluguba.

PROPERTIES

BIG ENOUGH TO COUNT, *small enough to care*

Strong cattle aren't your only investment – Protect the farm behind them.

At EnVision Partners, we understand what it takes to build a strong operation – long days, tough seasons, and constant pressure to get it right.

But in today's environment, it's not just your livestock performance that matters.

With ongoing Federal Budget changes, increased scrutiny on structures, and rising costs, many primary producers are more exposed than they realise.

The question is simple:

If something changed tomorrow – is your farm wealth properly protected?

- Protect land, livestock, and business assets
- Strengthen structures against risk, taxation and uncertainty
- Plan for succession and the next generation
- Keep your wealth where it belongs – with your family

Matthew Burke, our strategy specialist, works directly with producers like you to identify vulnerabilities and put practical strategies in place.

No jargon. No theory. Just clear, commercial advice tailored to your operation.

The next generation is counting on what you do today.

Book a complimentary meeting to help you determine whether a strategic review is necessary and to explore how such a review could benefit you, your family, and your business.

GUIDE TO GENOMIC RESULTS

ANC Charolais herd has had DNA profile on most animals and this is continually building throughout the entire herd.

Animals that have been tested for genomics [DNA profiled] are indicated in the catalogue. The Charolais Society of Australia requires the sire of calves to be registered in the Charolais Herdbook to have GGP100K DNA profiles on record and be Sire verified where possible.

Genomic Testing Guide	
DNA100K	Animal has DNA100K on file with the Charolais Society of Australia
SV	Animal has qualified to recorded Sire
DV	Animal has qualified to recorded Dam
PV	Animal has qualified to recorded parents

- BPA- F (free)
- BPA - C (carrier)

ANC Charolais is a MYO Free Herd, with no cases ever found.

No hair is removed on any cattle except scissors used to tidy up the sheath and tail.
